Feres Nefzi

Software & AI Engineer · Remote or on-site (UTC+1)
feresnefzi18@gmail.com | github.com/iknight18 | linkedin.com/in/feres-nefzi

SKILLS

AI & data: PyTorch, Ultralytics YOLO, Hugging Face Transformers, Depth-Anything, librosa, madmom, Demucs, Gemini API, Claude Code / agent tooling, TensorFlow, scikit-learn, Pandas, OpenCV
Languages: TypeScript, Python, Rust, JavaScript, Java, C#
Product engineering: React, Next.js, NestJS, FastAPI, Node.js, Express, Tailwind CSS, Storybook, design systems, Vitest, Jest, Cypress
Infrastructure: Docker, Kubernetes, GitLab CI, PostgreSQL, Redis, SQLite, MongoDB, Icecast, Caddy

EXPERIENCE

Front-End Engineer — InstaDeep (AI company) · Tunis, Tunisia Jun 2023 – Present

- Built interfaces for AI products across industries, including an AI supervisor for water-network operations, an airport operations digital twin, and optimisation and life-science tools
- Built an internal command-line tool that lets teams share and sync code between repositories
- Prototyped an AI chat starter running local language models with streaming responses
- Led a cross-team design system built on a Tailwind UI library, improving design consistency and efficiency by 40%
- Reduced product downtime by 25% by leading investigations into critical production bugs
- Optimized bundle size and build configuration of React and Next.js products, improving performance and scalability
- Wrote Dockerfiles and GitLab CI configurations with the DevOps team to streamline deployments

Full-Stack Engineer — Softago · Tunis, Tunisia Nov 2022 – Jun 2023

- Delivered turnkey MERN web applications for clients, including server administration and deployment

Software Engineering Intern — Softago · Tunis, Tunisia Jun 2022 – Nov 2022

- Built a dynamic QR marketing platform with custom modules, scan tracking and an augmented-reality experience; awarded best final-year project at ENICarthage

Part-time Full-Stack Engineer — Thor System · Tunis, Tunisia Aug 2021 – Mar 2022

- Built a parking-permit management system for the municipality of La Marsa with the client

Earlier (2020 – 2021): internships at Thor System and PwC Tunisia, Huawei Seeds of the Future

PROJECTS

- **DJ Engine** (Python, Rust): autonomous DJ that analyzes a music library with audio ML and mixes tracks live
- **Theater Pose Estimation** (PyTorch, computer vision): research on detecting actors and their poses on stage
- **Claude Workbench** (TypeScript, Next.js): local-first workspace for running and organizing AI coding agents
- **Fripa** (team project; NestJS, React, Gemini API): swipe-to-shop thrift store with AI-generated listings
- **FlashLink** (TypeScript, React Native): sends text from a phone flashlight to a camera over a custom protocol

EDUCATION

Engineering Degree in Computer Science — ENICarthage, Tunis · 2019 – 2022
Preparatory Cycle in Mathematics and Physics — IPEIT, Tunis · 2017 – 2019
AWS Academy Graduate — Cloud Foundations
Languages: Arabic (native), French, English

HONORS

NASA Space Apps Challenge: Global Nominee 2018, Local People's Choice Award 2017 · Best final-year project and best poster, ENICarthage
